Performance by exam section

Each section and its corresponding percentage of the exam appears to the left of the chart. The length of the bars represents your section-level performance. Shorter bars reflect weaker performance, and longer bars reflect stronger performance.

Note: Because the number of questions in each section varies, the length of the bars cannot be used to calculate the number of correctly answered questions, and bars cannot be combined to determine the percentage of correctly answered questions on the overall exam. If a bar is not displayed for a skill area, no questions related to that skill area were answered correctly.

You will be notified if any changes are made to your score or passing status.

DISCLAIMER

This exam was designed so that your score can be used to make a pass/fail decision. No decisions were made based on individual section-level performance. The exam was not designed with the intent to provide diagnostic feedback about your skills, and steps were not taken during the exam development process to support that level of score reporting. Therefore, candidates should exercise caution when interpreting the section-level score information provided in this report and use it only as a starting point for future exam preparation.

To view your score report, sign-in to your Learn profile, navigate to Credentials and then Certifications. In the Past Exams section, select "View details on provider site." You will then be able to retrieve, save, and print your Score Report from the exam delivery provider's website.
